

## Extract Inquiry Evidence: Martin Leadbetter (2)

The extract from the Inquiry testimony shown below refers to the chart to be found at this link.

<http://www.thefingerprintinquiryscotland.org.uk/inquiry/files/FI2310.03.pdf>

Open the chart and follow the testimony with reference to the chart as required.

### Extract of Testimony

*'13 A. Yes. 14 and 15. We've had two enlarged pores which sit  
14 side-by-side. They are quite prominent actually on  
15 the -- yes, I don't know if you can see them here on  
16 chart 11. On my chart 11 they are approximately where  
17 feature 2 is marked. You can see the two circles?*

*18 Q. I think what we are going to have to do when you say do  
19 we see the two circles you are going to have to just  
20 again assist by pointing to the two circles that you  
21 have in mind. Perhaps if we could use an arrow feature.*

*22 A. It's point 2 so -- the line at point 2 actually goes  
23 through them.*

*24 Q. Mr Leadbetter, it is simply that no-one can see them so  
25 therefore we can't actually mark them. Again, if you  
1 can indicate to Miss Allen, if we take the pen just now  
2 which is on line number 2 -- perhaps if we take the pen  
3 away just now, what I will do is if you allow me a  
4 second I will take over. So my pen is poised now at  
5 point number 2?*

*6 A. It's basically in between your pointer there.*

*7 THE CHAIRMAN: It bisects the two pore marks.*

8 A. *More or less.*

9 *THE CHAIRMAN: Do you see that?*

10 *MR MOYNIHAN: I've not see it yet. You say it bisects the*  
11 *two. My pen tip is on the point of point number 2.*

12 *A. It's slightly above. They are actually adjacent to each*  
13 *other. It's like a pair of spectacles.*

14 *Q. So adjacent to each other so that the two circles --*

15 *A. It actually looks like a pair of spectacles with a nose*  
16 *underneath it.*

17 *Q. This is just a purely mechanical process just now.*

18 *A. Where you had it just then is in between the two of*  
19 *them.*
